Your students will absolutely love **The BUG Roadshow!** This show can be both a virtual show or a live show at your school. It's a field trip to the incredible world of insects! (Don't worry, there are no live insects- only large models and video close ups of real insects.) It's crawling with fun and more than covers the NY curriculum on insects. This show is perfect from K to 5<sup>th</sup> grade and is 45 minutes long.

**The BUG Roadshow** is a very entertaining and interactive show that reveals the secret world of insects as you've never seen them before! I use a powerful video projector to show your students high resolution video close-ups of insects. I also project close-ups of real and model insects to show your students the amazing physical features, adaptations, and life cycles of many common insects, including butterflies, moths, bees, ants, house flies, centipedes, mosquitoes, ladybugs, aphids, praying mantis, dragon flies, meal worms, termites, spiders, and more!

The **BUG Roadshow** will also show how insects are the great recyclers and pollinators of the world. You will be amazed how much your students will learn in 45 minutes! By the end of the show, your students will realize how amazing and important insects really are to the circle of life (ecology). This STEM show teaches many important scientific principles of biology and environmental science.

**The BUG Roadshow** was produced by Lee Ognibene, former Director of the Sayville Planetarium, and award-winning retired science teacher and videographer. The show features amazing close-up video of insects and a music soundtrack that includes Lee's narration. You and your students will love this show! Expect laughter, learning, and rave reviews!

If you book a VIRTUAL SHOW, I will send you a link to my streaming service and a one-day password. Just click the link to my streaming service, put in the password and enjoy the show on your smartboard with your class. If you don't have smart boards or computers in every classroom, project the show on a screen in your classroom, cafetorium or media center with a video projector and laptop computer using your schools' Wi-Fi. **Best of all, distance-learning students can see it at home during school hours!**

**Price: \$350 for one-day Virtual Shows for the WHOLE School!** Every class can stream the show on that day at all different times! What a bargain!

If you book a LIVE SHOW, I will come to your school and present a live show using my own quality equipment. **Price: \$350 for one live 45 minute showing** at your school.

All my shows are accepted by all 3 Long Island BOCES Arts in Education programs. They are listed in the online BOCES Arts in Ed catalogs under "Exploratory Enrichment". To find the Bug show, search keywords "insect" or "Bug" or "Ognibene" to find all my shows. Check out my other 5 science shows on my website: [scienceroadshows.com](http://scienceroadshows.com) (Dinosaurs, Space Roadshow, Rainforest Adventure, Our Endangered Earth, and Under the Sea.)
